

Committee on Oversight of Government Operations and Public Accounts. We will continue with our theme from yesterday.

First, I would like to ask Mr. Enook to lead us in prayer. Thank you.

>>Prayer

**Chairman:** Thank you. Once again, everyone has a copy of the agenda in front of them. Are there any questions or concerns? There are none. We are going to jump right into the action this morning. I would like to ask Mr. Akeeagok to provide his opening comments, please.

**Mr. Akeeagok (interpretation):** Thank you, Mr. Chairman and Committee Members. I am pleased to appear before the (interpretation ends) Standing Committee on Oversight of Government Operations and Public Accounts to speak about the *Access to Information and Protection of Privacy Act*. (interpretation) I would like to introduce Jessica Bell, Manager of Access to Information and Protection of Privacy Office, who will be assisting me with this process.

The Department of Executive and Intergovernmental Affairs works with all public bodies responsible under the ATIPP Act to ensure we are providing services to Nunavummiut. This includes a consistent approach to:

- Applying fees
- Releasing records
- Tracking administrative information pertaining to ATIPP requests for the annual report and administration of the ATIPP Act; and
- Providing regular training to all government employees.

information is available.

I think that through this Committee, on an annual basis, having discussions on the commissioner’s report, it raises a lot of good awareness. I think that if there are a number of individuals and a number of businesses that are accessing information through the access to information, we hope that this continues.

Also, if a person feels that their privacy is breached, there are phone numbers and by contacting our offices, we try and work towards that as much as possible. I am quite pleased with the work that the Standing Committee has done in terms of raising this awareness on access to information and it helps complement our training and our education to the public. (interpretation) Thank you, Mr. Chairman.

**Chairman:** Thank you. Ms. Angnakak.

**Ms. Angnakak:** Thank you, Mr. Chairman. Thank you for that answer. I think, too, what I’m also getting at is the fact that some people, and I think there are a lot of people, who don’t realize that their information about themselves is private and should not be shared. That’s kind of where I’m going with this, but I’m going to go on to my next question. It’s following the same kind of area.

I want to ask: in your capacity, what is your opinion on how well do the employees of the GN, or the Government of Nunavut, know the Act, the Information and Privacy Act, and the responsibilities that they hold under it? Thank you, Mr. Chairman.

**Chairman:** Thank you. Mr. Akeegok.

staff know about the privacy act that they're actually in compliance with it? What measures do you have in place to ensure this? Thank you, Mr. Chairman

**Chairman:** Thank you. Mr. Akeegok.

**Mr. Akeegok** (interpretation) Thank you, Mr. Chairman. (interpretation ends) For that type of scenario, we work with the departments to ensure in terms of whether to make them aware of the privacy act and work with the departments to find what privacy is and isn't.

If there are any breaches, we assist the departments in getting directives or protocols in place to ensure that the private information of individuals are protected.

There was an amendment to the act on the oversight of the commissioner to increase her responsibilities on this issue, too. It's a very collaborative effort that we take. When we do hear of breaches then we task the departments to ensure that there are protocols or directives to ensure that privacy [breaches] don't repeat [themselves].

It's an ongoing issue that we try to balance as much as possible. For the frontline staff that our government has, those are the 'awarenesses' and we also offer training programs for these specific things. (interpretation) Thank you, Mr. Chairman.

like she has been consulted pretty well on some of our large projects.

One of the problems for us in terms of consultation is timing on projects. Oftentimes, it takes quite a bit of time to get the consultation process through and that can delay some of our larger projects, which can be an issue for us. I believe now, especially as the commissioner has committed to spending more time on ATIPP for Nunavut, that in the future, this is going to work very well for us and we're committed to working with the commissioner on any new or large changes to existing projects. Thank you, Mr. Chairman.

Is my understanding correct, that the community health centres and health professionals have to actually make a request for training but that the process wasn't cumbersome to undertake. As you stated, they have to first make the request. Thank you, Mr. Chairman.

In your report back then, you stated that the government or I thought you clarified the government was working on developing a Privacy Management Manual to be used as a policy. The members also expect to see this policy tabled as the department committed to tabling it in the Legislative Assembly.

local context as needed.

We have been looking at various options for continued training within the GN as well as to municipalities and other organizations as we expand the scope of the ATIPP act and we're looking at options for creating more internal training as well as what may be required by an external consultant as well.

As for numbers, we haven't put it together yet, but we're moving in that direction. Thank you, Mr. Chairman.

**Chairman:** Thank you for that response. I'm just wondering which path to go down now. In some of the responses that we have been getting... I'm trying to think of how to word this appropriately. You have recognized the authority of other government agencies with their own responsibilities of access to information and privacy, but I think one thing that I question is maybe your department's lack of oversight or maybe some of the commitment level and obligations that those departments have to you as a central agency.

I would like to see a little bit more, maybe, teeth to some of your requests. Maybe it's just my opinion that it seems maybe you have been a little complacent in receiving some of the information that has been requested by your department. I would like to maybe get some information on how you plan on moving forward with those objectives. Mr. Akeegok.

I hope that the department and all the departments that are listening have taken note of some of the questions, comments, and responses. I wanted to thank everyone for their well-thought-out preparation for this and to thank the staff here with us that help prepare us with briefings and the translators as well as the page for keeping us hydrated.</p> <p>With that, I would just like to close out this and adjourn the hearing.
