MESSAGE FROM THE MINISTER

It is my pleasure to present the Office of the Fire Marshal 2015 Annual Report.

Fire prevention is critical in avoiding loss of life, injury and damage in our homes, schools and public buildings. These losses place a burden on families, communities and governments which, in many cases, are preventable.

Public awareness and education initiatives are the foundation of our Fire Prevention Strategy. It is essential that we provide Nunavummiut with the right tools to make fire safe choices in their homes, schools and workplaces.

The Office of the Fire Marshal is assisting with promoting fire safety and helping build capacity at the community level. We will continue our efforts to increase support to municipalities for fire prevention education. Equipment and fire trucks are being upgraded or replaced as needed. We are also working with the Nunavut Municipal Training Organization to help provide firefighters with training, tools and resources to effectively respond to fire emergencies.

The Fire Prevention Strategy focuses on keeping our people and our communities safe. We enjoy working with our partners to promote fire safety in Nunavut and I would like to thank staff and volunteers of local fire departments for their commitment to their communities.

I challenge all Nunavummiut to do their part to make everyday a fire safe day!

The Honourable Joe Savikataaq
Minister, Department of Community and Government Services

MESSAGE FROM THE OFFICE OF THE FIRE MARSHAL

The Office of the Fire Marshal's 2015 Annual Report provides fire related statistics for the Territory and updated information on the Fire Protection Strategy. Some of the statistics are estimates of fire loss damages, value at-risk and insurance costs are used

to compare our past performance in reducing fire losses and the development of fire prevention programs that help address fire safety issues.

The Office of the Fire Marshal is investigating projects for building safety and is helping provide a safe environment for Nunavummiut through fire prevention inspections, firefighter training and other fire prevention programs.

Local Fire Departments continue to play important roles in fire protection and prevention. Firefighters share a great deal of concern for the safety of their communities

throughout the Territory. Their service to communities ensures families and friends remain as safe as possible, but we all share the responsibility to support their efforts.

We are committed to continuing our fire prevention efforts and we are focusing on reducing deaths, injuries and property losses caused by fire.

Robert Prima Fire Marshal

2015 TERRITORIAL FIRE LOSS SUMMARY

In 2015, there were 141 reported fires in Nunavut. This is a slight increase over last year's total of 134 reported fires and it is slightly lower than the average of 145 fires over the last five years. In the last five years, the number of reported fires has been within the range of 120 to 161 per year. This includes all types of fires, small or large, regardless of response by the local Fire Department.

Unfortunately, there were casualties related to fires in the Territory in 2015; there were five deaths and 18 injuries in total. The total amount of actual fire loss in 2015 is \$44.56 million which is much higher than the \$5.41 million in losses for 2014. The total property value at risk has significantly increased from \$403 million in 2014 to \$622 million in 2015.

In 2015, incendiary fires were again the number one reported cause of fires at 40 per cent; human failing was the second highest at 29 per cent; mechanical/electrical failure/malfunction was third highest at 16 per cent; and; misuse of source of ignition was fourth highest at seven per cent.

Smokers' material/open flame was the highest reported source of ignition at 51 per cent; cooking equipment has again increased to 26 per cent; heating equipment has also increased to 12 per cent and; appliances and electrical equipment is at 10 per cent.

Fire prevention and public education programs continue to be at the forefront of the Fire Protection Strategy. The financial significance of losses of community infrastructure, and most importantly, deaths, are substantial enough for Nunavummiut to strive towards the elimination of all types of fires. Programs to assist fire departments with funding to provide fire prevention seminars in communities are being developed and will be introduced as soon as possible.

FIRE PROTECTION STRATEGY UPDATE

Fire Prevention Inspections

With two of the Assistant Fire Marshal (AFM) positions still vacant in the Office of the Fire Marshal, the remaining AFM staff continues to visit communities to address fire prevention issues. During these visits, the AFMs performed over 1015 fire prevention inspections in the following locations:

- Inspections on critical community infrastructure and high life safety risk buildings (schools, health facilities, arenas, community centres, daycares, power-generating facilities);
- Inspections on other public and high fire hazard potential buildings (hotels, restaurants, Hamlet buildings, retail stores, maintenance workshops, warehouses);
- Inspections on multi-family housing units (duplexes and up mechanical rooms and common areas); and
- Inspections and equipment audits on community fire halls, fire trucks, and equipment.

Code Enforcement Plan Reviews

To safeguard people and property, the Office of the Fire Marshal reviews plans and specifications for the construction, alteration or repair of structures or premises to determine that the proper precautions are taken against fire and the spread of fire.

FIRE PROTECTION STRATEGY UPDATE

Fire Equipment Contributions

The AFM completes equipment audits during community visits to inventory equipment that the department has received and record the condition of the equipment. The audits also document fire hall design and condition, as well as fire truck specifications and condition. These audits determined the overall status of fire departments and if additional equipment is required; the following equipment has been provided due to the audits:

- Replacement of worn/damaged protective clothing (bunker gear, gloves, boots, helmets, etc.) in regional warehouse stock;
- Replacement of worn/damaged firefighting equipment (hoses, gated wyes valves and nozzles) in regional warehouse stock;
- Replacement parts for Draeger self-contained breathing apparatus (masks, straps, etc.) for all departments; and
- Replacement of damaged/unserviceable radios and pagers as well as repair services for inoperable units.

Fire Prevention and Public Education:

In the continuous effort to eliminate fire losses in Nunavut, the Office of the Fire Marshal provides fire prevention programs and information to fire departments and communities. These fire prevention programs are a valuable part of the Office of the Fire Marshal's mandate to eliminate losses due to fires in the Territory. The following points highlight the results of the 2015 fire prevention program;

• Fire Prevention Coloring Contest:

- The contest received 358 Fire Prevention posters and coloring templates from eight schools from across the Territory;
- Cash prizes for the winners were sent to the applicable District Education Authority for use in student activity programs; and
- The winning entries also received various personal prizes.

Fire Prevention Week and Activities:

- A number of fire departments provided fire prevention activities in their respective communities (fire hall tours, fire prevention sessions in schools, open houses and firefighter recognition gatherings); and
- Some fire prevention giveaways were sent to fire departments to assist them in their fire prevention presentations.

• Fire Prevention Annual Calendar:

- Monthly fire prevention tips;
- Pictures of firefighter training sessions; and
- Fire prevention drawings from the school fire prevention contest.

• Fire Prevention Workshop:

- A 10-day workshop was organized in Iqaluit;
- About 18 Firefighters from across the Territory participated;
- They were interested in learning more about fire prevention and practising their presentations;
- Firefighters were introduced to learning techniques and how to present information to a wide array of audiences; and
- The session was well accepted and the firefighters who participated became more comfortable doing fire prevention sessions in their home communities.

FIREFIGHTER RECOGNITION PROGRAM

The volunteer members of all Nunavut fire departments and the commitment required to become an effective firefighter is quite significant and is encouraged through the Firefighter Recognition Program. This program promotes and assists with developing greater appreciation of the efforts of people who contribute to firefighting in Nunavut. This program was implemented to provide token awards that recognize the contribution of those who serve as volunteers. Fire departments are encouraged to submit volunteer member names and years of service in support of this program.

30 Year Service Recognition:

Years of Service Oak Recognition Plaque

Fire Services Exemplary Service Medal

A person may be awarded the Medal if the person:

- (a) was a member of a fire service on or after August 29, 1985;
- (b) has completed 20 years as a member of a fire service, of which at least 10 years have been served in the performance of duties involving potential risk;
- (c) has a record of exemplary service during the required period;
- (d) has had no serious disciplinary action taken against him or her during that period and has none pending; and
- (e) has been awarded the Medal and is eligible to be awarded a bar in respect of each additional 10-year period of service in a fire service after the initial 20-year period.

To be eligible for this medal, the firefighter's information must be submitted to the Office of the Marshal for consideration. This must be done by the Fire Chief or community representative once the required time has been met. The Office of the Fire Marshal reviews submissions for eligibility and submits the applications to the Director, Honours, The Chancellery of Honours.

There have been 12 medals award previously and there are 29 fire fighters throughout Nunavut who are eligible to receive the Fire Services Exemplary Service Medal in 2016.

2015 FIRE SERVICE TRAINING

With the continued partnership with the Nunavut Municipal Training Organization (MTO) there were 16 fire service training courses provided in 2015, which involved 195 firefighters. This provided for seven community-based General Level courses and nine Territorial-based courses. Included in these training courses were the Nunavut Firefighter Competition and the National Aboriginal Firefighter Competition.

Fire Service Training Courses

The following is a list of training courses that were offered in 2015 by the Office of the Fire Marshal in partnership with the Municipal Training Organization.

2015 National Aboriginal Firefighter Competition

From August 3rd - 9th, 2015, 20 firefighters from across the Territory gathered in Iqaluit to participate in the 10th Annual Nunavut Firefighter Competition. Firefighters practised the evolutions of basic firefighting, which are designed to add to their skills during firefighting operations. After four days of practice, a team of six firefighters was selected by their peers to represent Nunavut at the National Aboriginal Firefighter Competition.

The annual National Aboriginal Firefighter Competition for 2015 competition was held from August 11 - 17, 2015 in Rama, Ontario. This was the tenth year that Nunavut participated in the competition. It was a four day event, with one day for sports activities, two days of training and one day for the competition. The Nunavut team finished in seventh place out of eight teams; with the committed teamwork, inspiration and assistance they showed to their fellow firefighters and competitors, our firefighting team earned the Max McNeill Award for Most Sportsmanlike Team for the eighth time in ten years at the competition.

Through participation in the competition events, Nunavut's firefighters come together from across the territory to take part in additional training, skills development and teambuilding. Nunavut firefighting teams have represented the Territory very well at the national level and the competition has helped develop kinship within the Nunavut Fire Service.

Captain Jollie Enoogoo - Pond Inlet, Kyle Amautinuar - Kugaaruk, Brian Aggark - Arviat, Jim Papak - Rankin Inlet, Gary Tinashlu - Coral Harbour, Steven Iqalukjuak - Clyde River, Coach George Nagmalik - Hall Beach, Frederick Morrison - OFM, Jerry Anilniliak - OFM.
