Tuesday February 25, 2025

It was determined by student support services and our student support service providers that the current bathroom project does not meet the space requirements to operate the student support equipment needed to support one of our student's learning goals.

As a result, AccuTech is again drawing up plans to revisit the project based on the guidance of our student support providers and JASS Principal.

Awaiting the next meeting to discuss the next set of blueprints for the project.

As of now, the student still does not have access to a washroom facility that supports their learning goal. The request for this project begun during the 2020-21 school year.
