*Printout of Signatories to Online Petition
Concerning Smoking Ban in Multi-Unit Dwellings*

Thank you, Mr. Speaker. I wish to table a printout of the names of over 400 individuals, most of whom live in Iqaluit, who have signed an online petition calling on the Government of Nunavut to ban smoking in multi-unit dwellings.

Although this document does not strictly conform to a formal petition under Rule 43, it does illustrate the concern that surrounds this issue. I also wish to note for the record that I am proud to have also signed this petition, which was organized by one of my own family members.

Mr. Speaker, I encourage all Members to review the item with care.

Nov 2/16

<http://www.thepetitionsite.com/153/812/207/support-a-smoke-free-nunavut-ban-smoking-in-multi-dwelling-housing-and-save-our-children/>

Second Hand Smoke (SHS) contains more than 7000 chemicals, 250 of which are harmful and 69 are known to cause cancer. SHS is proven to cause death in non-smoking adults and children. SHS causes lung cancer, heart and lung diseases in non-smoking adults and children. Children are especially susceptible to exposure of SHS because they are less able to protect themselves.

There is no safe level of exposure to SHS, any amount is harmful. The only way to fully protect non-smoking adults and children is to make the entire building smoke free. This petition declares all residential complexes and condominiums, attached and semi-attached row houses be smoke free by law, to ensure the safety and health of our non-smokers and especially the children.

57% of Nunavummiut smoke, and 40% of our cancer related deaths are caused by lung cancer. Children may develop asthma, lung cancer, respiratory infections and diseases and even brain tumours from being exposed to smoke. Nunavut relies on multi-dwelling units to provide housing and no one should be forced to breathe cancer and death causing smoke because of another person's habit. Sign this petition and together lets stop SHS in our multi-unit dwellings and save our children from entirely preventable diseases. Currently we are the worse off district in Canada for health related issues, let's make our future brighter and healthier, support a Smoke Free Nunavut!

127.	Austin Rice	Iqaluit, Canada	As a person allergic to smoke, I have suffered from headaches and nausea when exposed to even small amounts of second hand smoke while living in apartments in Nunavut. Now that I have kids who may have the same sensitivities as me, I want to assure that they do not have to suffer. I urge our leaders to consider this petition and I applaud Sharon for taking the initiative on this important health issue.

141.	Tara MacAskill	Iqaluit, Canada	Awesome, keep up the fight. This is such an important cause and will affect the health of all Nunavummiut.
142.	Tina DeCouto	Iqaluit, Canada	
143.	Laura Deal	Iqaluit, Canada	I smoked for a period of 8 months when my daughter was about 2 years old. I never exposed her to the smoke and never smoked inside, but I regret even letting her see me puff on a cigarette as she soon started to mimic my actions. I knew then that it was time for me to stop because I could see I was changing her perception of smoking (and of me). I did not want her to think it was okay to smoke. I DO not want her to think that smoking is something people do casually without consequence. It is terribly unhealthy - all of the time, inside or out, recreationally or not. I am an ex smoker. I smoked for 9 years or more. I've quit a number of times. I know it is hard to quit. I know you have to have good reason to be successful in quitting smoking, but it is possible! Right now, I'm living in one of those multi-unit buildings that was mentioned in this morning's Nunatsiaq article online. I often smell cigarette smoke when coming in and <i>(continues on next page)</i>

	Name	From	Comments
143.	Laura Deal	Iqaluit, Canada	<i>(continued from previous page)</i> out of my unit and some tenants/guests even smoke in the exits and stairwells in the building where I live. It IS unhealthy, but we ALSO need to consider that there are many other people who live with us in those buildings. Essentially, we're sharing space with dozens of other families who trust that we are all doing what we can in terms of safety and fire prevention. Smoking anywhere inside the buildings - in the stairwells, in your units, in the entryway - is unhealthy and unpleasant for others and ALSO increases the risk of fire. I think we all should want to live in a clean, safe and secure building. Please, smoke outside.

150.	Meeka Serkoak	Ottawa, Canada	
151.	Annie Aningmiuq	Ottawa, Canada	Thank you for bringing up this difficult task, Sharon! I agree with you 100%. I've lived in apartments where I could smell cigarettes from other tenants and it's a horrible feeling not being able to do much to get rid of the smell, especially when you have babies that you need to protect and care for. I hope you reach your goals!

196.	Jimmy Qaqqaq	Baker Lake, Canada	I am a non-smoker, never have been, my parents smoked in the house when I was a child, there use to be a blue haze in the house right in the middle of the house. Whenever I get a cold I have difficulty sleeping because I feel like I can't get enough air (I never really was like that when I was younger) so I blame the smoke I breath in my parents home. I recently was at Costa Rica where smoking in public places is not allowed, I asked our local tour guide why there was a no-smoking sign up in the mountains where it almost always rain or misty weather, his answer was "it is in our country that no-smoking in public is the policy". Just last week we were in Winnipeg, after being in Costa Rica I started seeing the a lot of people lighting up in the streets, I thought "wouldn't it be nice if our country had a policy like Costa Rica?" I believe in "freedom of rights", I believe we deserve a place/country with clean air inside and out.
