the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1998. The public sector has also become an important employer of women, with 5.5 million women employed in the public sector in 1998, compared with 4.5 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of women in its workforce. In 1998, 88% of the public sector workforce were women, compared with 78% in 1980.

Another reason is that the public sector has a high proportion of women in its senior management. In 1998, 33% of the public sector senior management were women, compared with 23% in 1980. This is a significant increase, and it suggests that the public sector is becoming more gender equal in its senior management.

There are a number of reasons why the public sector has a high proportion of women in its senior management. One reason is that the public sector has a high proportion of women in its senior management. In 1998, 33% of the public sector senior management were women, compared with 23% in 1980.
