Re: Anticipated Flights to Clyde River, NU

To whom it may concern,

The Hamlet Council of Clyde River were very happy to have Canadian North start servicing our community again, which would have given our residents so much more options in travelling and freight services.

We would like an explanation of why it will no longer proceed. At least an explanation to the Hamlet Council would be appreciated, so that we can inform the community of the reasons why we will no longer be considered to be serviced.

The few jobs that would've been created would have benefitted us tremendously, and since we have to wait days to get a seat through First Air, even on medical travel, this would've improved the passengers waiting time. Currently, those that have to go back home from igaluit, they have to wait about a week to get back home, if lucky it'll be at least three days.

Right there, the improvement in accommodations at the boarding home would lighten up the patient time, as they would have gone home, and those that just went to Igaluit would have better chance of having room at the Boarding home.

Another reason, we usually have to order caribou meat from the Kivalliq Region, sometimes it takes several months for them to arrive, if they did not get lost in transit. Usually, they are held at Cargo, mostly this is in regards to the codeshare, which I am happy that that will be ending, but if our traditional food orders start being brought in directly to our community, it would be such an improvement. We would start receiving them while they are still fresh.

That is just one of the reasons the new service would've improved our services tremendously. We would appreciate whatever information you could provide at your earliest convenience.

Sincerely,

Joillag James Qillag

Mayor
